

Rob Gramlich is Senior Vice President for Public Policy of the American Wind Energy Association, the national trade association of over 1000 entities involved in all aspects of wind energy production, based in Washington DC. Rob joined AWEA in 2005 and now leads the organization's federal and state policy, statistics, and public affairs functions. He has testified before the US Congress, Federal Energy Regulatory Commission (FERC) and state regulatory commissions, and has served on the U.S. Department of Energy's Electricity Advisory Committee. He has published articles on wind integration, wind markets and policy, economic incentives for environmental protection, market power regulation, and electricity market design.

Rob served as Economic Advisor to FERC Chairman Pat Wood III and Senior Economist for PJM Interconnection, and worked for PG&E National Energy Group, World Resources Institute, and the Lawrence Berkeley National Laboratory in the 1990s.

Rob has a Master's degree in Public Policy from UC Berkeley and a BA with honors and distinction in economics from Colby College.
